# Veraglo ERP — Sales Module Feature Reference

**Document version:** 1.0

**As of:** June 2026

**Codebase:** main branch (src/sales.jsx, src/enquiry.jsx, src/customer.jsx, related modules)

This document describes every feature currently implemented in the **Sales & CRM** module of Veraglo ERP, including navigation, workflows, master data, documents, approvals, integrations, and reports.

---

## Table of contents

1. Module overview
  2. Navigation structure
  3. Quick actions
  4. Feature reference by section
  5. Document conversion pipeline
  6. Sales order lifecycle
  7. Master data dependencies
  8. Numbering
  9. Approvals and field permissions
  10. PDF, print, and email
  11. Reports
  12. Cross-module integrations
  13. Roles and permissions
  14. Technical notes
- 

## 1. Module overview

The Sales module is a full **quote-to-cash** workspace covering:

- **CRM:** customers, enquiries, leads, follow-ups, communication history
- **Commercial documents:** quotations, proforma invoices, sales orders, tax invoices
- **Operations visibility:** order tracking, order history, discount/revision approvals

- **Setup:** price list, currencies, PIN codes
- **Reporting:** sales registers, export analytics, enquiry analytics

Primary implementation files:

| Area                        | File                   |
|-----------------------------|------------------------|
| Sales core                  | src/sales.jsx          |
| Enquiry management          | src/enquiry.jsx        |
| Customer master & 360°      | src/customer.jsx       |
| Document conversion dialogs | src/doc-conversion.jsx |
| Export invoice helpers      | src/invoice-export.jsx |
| Receivables (shared)        | src/accounts.jsx       |
| Dispatch / shipments        | src/dispatch.jsx       |

## 2. Navigation structure

The Sales module sidebar is grouped as follows:

### Overview

| Section   | Label            |
|-----------|------------------|
| dashboard | <b>Dashboard</b> |

### Sales & CRM

| Section    | Label                    |
|------------|--------------------------|
| customers  | <b>Customers</b>         |
| enquiries  | <b>Enquiries</b>         |
| leads      | <b>Leads</b>             |
| followups  | <b>Follow-ups</b>        |
| comms      | <b>Communication</b>     |
| quotations | <b>Quotations</b>        |
| proformas  | <b>Proforma Invoice</b>  |
| invoices   | <b>Tax Invoices</b>      |
| orders     | <b>Sales Orders</b>      |
| tracking   | <b>Order Tracking</b>    |
| history    | <b>Order History</b>     |
| discounts  | <b>Discount Approval</b> |
| revisions  | <b>Revision Approval</b> |

### Setup

| Section    | Label             |
|------------|-------------------|
| pricelist  | <b>Price List</b> |
| currencies | <b>Currencies</b> |

| Section  | Label            |
|----------|------------------|
| pincodes | <b>PIN Codes</b> |

## Reports

| Section | Label          |
|---------|----------------|
| reports | <b>Reports</b> |

**Note:** Enquiry management appears under Sales → **Enquiries**. Admin permissions may also list a separate enquiry app ID, but the UI lives inside the Sales module.

## 3. Quick actions

The Sales module header provides one-click shortcuts:

| Action                  | Goes to                          |
|-------------------------|----------------------------------|
| <b>New Sales Order</b>  | Sales Orders (opens create flow) |
| <b>Create Quotation</b> | Quotations                       |
| <b>Tax Invoices</b>     | Tax Invoices                     |
| <b>Add Customer</b>     | Customers                        |

## 4. Feature reference by section

### 4.1 Dashboard

- Module KPIs and work-queue tiles via `VG.ModuleDashboard (modId="sales")`.
- Surfaces alerts such as pending quotation approvals, follow-ups due, SO revisions, and orders ready to invoice (when permitted).
- Requires **View** permission.

### 4.2 Customers (`customer.jsx`)

**Purpose:** Master data for all buyers; foundation for every sales transaction.

**UI pages:** - **Customer Master** — list with search, filter, export, print - **Add New Customer** — full-page form (not a floating modal) - **Customer 360°** — consolidated view of all customer activity

**Form tabs:** 1. Basic  
2. Contacts  
3. Addresses  
4. Commercial  
5. Banking

- 6. Documents
- 7. System

**Key fields (summary):**

| Area       | Fields                                                                                    |
|------------|-------------------------------------------------------------------------------------------|
| Identity   | Customer code (auto), legal name, display/trade name, type, category                      |
| Tax        | PAN, GSTIN, GST registration type                                                         |
| Contacts   | Multiple contacts with roles, phone, email                                                |
| Addresses  | Billing/shipping; default flags; PIN auto-fill                                            |
| Commercial | Currency, payment terms, delivery terms, credit limit/days, price list, discount category |
| Banking    | Remittance / account references                                                           |
| Documents  | KYC uploads                                                                               |
| System     | Status, approval status, owner                                                            |

**Statuses:** - Customer: **Active / Inactive / Blocked** - Approval: **Approved / Pending / Rejected**

**Customer 360° includes:** - Enquiries, quotations, proformas, sales orders, invoices, shipments, payments, follow-ups - Finance tiles (statement, ageing) when user has Accounts/Admin access  
 - Actions: Preview, Print, PDF download, Transaction summary, Statement PDF, Email statement, Export Excel (CSV)

**Permissions:** Add, Edit, Delete, Approve (for pending customers), Print/Export

### 4.3 Enquiries (enquiry.jsx)

**Purpose:** Capture RFQs and opportunities; track offer pipeline; convert to quotation or sales order.

**UI:** - **Enquiry Management** dashboard with KPI tiles - **Add Enquiry** — full-page builder - **Enquiry List** with status/priority/type filters - **Enquiry reports** (embedded or under Sales → Reports)

**Builder sections:** - Customer (existing or new company details) - Project (name, location, RFQ reference) - Requirements (multi-line: description, category, qty, unit, tech spec, drawing ref) - Other (source, priority, assigned salesperson, dates, remarks)

**Enquiry statuses (12):**

1. New Enquiry
2. Under Review
3. Clarification Required
4. Quotation Under Preparation
5. Offer Sent
6. Follow-up Pending
7. Negotiation

- 8. Revised Offer Sent
- 9. Won / Converted to Sales Order
- 10. Lost
- 11. Closed
- 12. Cancelled

**Detail view actions:** - Create Quotation

- Request Clarification
- Add Follow-up
- Mark Offer Sent
- Create Revised Offer
- Mark Negotiation
- Convert to Sales Order
- Mark as Won / Lost
- Cancel / Close Enquiry
- Upload Documents
- View Timeline

**Dashboard tiles:** New enquiries, Under review, Quotation prep, Offers sent, Follow-ups today, Overdue follow-ups, Won, Lost, Conversion %

**Number prefix:** ENQ

---

## 4.4 Leads

**Purpose:** Lightweight opportunity tracking before formal enquiry.

**Fields:** Customer (master), title, estimated value, date, source, stage, status, remarks

**Sources:** Website, Referral, Exhibition, Cold call

**Stages:** New, Qualified, Proposal, Negotiation

**Statuses:** Open, Won, Lost

**Number prefix:** LEAD

---

## 4.5 Follow-ups

**Purpose:** Schedule and complete customer/enquiry follow-up tasks.

**Fields:** Customer, date, time, mode, next follow-up date, status, remarks; optional link to enquiry (refType: Enquiry)

**Modes:** Call, Email, WhatsApp, Meeting, Visit

**Statuses:** Pending, Done

**UI badges:** Overdue count, Due today count

**Integration:** Completing a follow-up linked to an enquiry updates the enquiry timeline via VG.enquiryOnFollowupDone.

---

## 4.6 Communication

**Purpose:** Log customer interactions (call log / CRM notes).

**Fields:** Customer, date, mode, subject, note

**Modes:** Call, Email, Visit, Meeting, WhatsApp

**Note:** Create-only in current implementation (log communication).

---

## 4.7 Quotations

**Purpose:** Commercial offers with line-level pricing, tax, and terms.

**UI:** - **Quotations** list with lifecycle filters - **Add Quotation** / **Edit Quotation** — full-page builder  
- Quotation detail view with conversion workflow panel

**Header fields:** - Customer, contact, GSTIN

- Date, validity (days), warranty, subject
- Project name, project ref, RFQ ref, project location
- Billing & shipping addresses
- Currency, exchange rate
- Payment terms, delivery terms

**Line fields:** - Item (from Item Master), description, HSN

- Qty, unit, rate, discount %, tax %, amount
- Freight, packing, insurance
- Round-off (auto/manual)
- Remarks, terms & conditions

**Quotation statuses:** - Draft

- Pending Approval
- Approved
- Sent
- Won
- Lost
- Revised

**Derived lifecycle display** (from linked documents): Draft → Pending Approval → Approved → Quote Sent → Proforma Issued → Sales Order Generated → Tax Invoice Generated → Dispatched

**Workflow:** 1. Save as **Draft** or **Submit** (auto **Pending Approval** if discount > 10%)

2. Manager **Approve** / reject

3. **Mark Won** / **Mark Lost**

4. **Send** (email opens mail client; marks Sent)

5. Convert to Proforma, Sales Order, Tax Invoice, or Dispatch (when Approved/Sent/Won)

6. **Revision history** on edits after document is sent

**Discount rule:** Line or overall discount > **10%** triggers approval (DISCOUNT\_LIMIT = 10).

**Field permissions (Sales Executive):** - **Rate:** visible, not editable

- **Discount %:** editable, triggers approval when over limit

**PDF:** Premium industrial/commercial offer layout via `VG.buildIndustrialDocument`

**Number prefix:** QT

---

## 4.8 Proforma Invoice

**Purpose:** Pre-invoice document for customer PO / advance payment / export shipping.

**UI:** Proforma Invoices list, Add Proforma Invoice, detail/PDF preview

**Fields:** - Customer, contact, GSTIN

- Proforma date, due date, validity days
- Linked sales order, customer PO reference
- Place of supply
- Payment & delivery terms, addresses
- Currency, bank details
- Line items, freight/packing/insurance, remarks

**Status:** Issued

**Creation paths:** - Manual entry

- Convert from quotation
- Generate from sales order (**Generate Proforma** on SO detail)

**Number prefix:** PI

---

## 4.9 Sales Orders

**Purpose:** Confirmed customer order; drives production, inventory, QC, dispatch, and invoicing.

**UI:** - Sales Orders list

- Add / Edit Sales Order — full-page builder
- Sales Order detail with stage stepper, timeline, and action buttons

**Header fields:** - Customer, contact, GSTIN

- Order date, customer PO ref, delivery date
- Priority: Normal, Urgent, High Priority, Critical, Custom
- Linked quotation
- Billing & dispatch address
- Payment & delivery terms
- Technical specifications, special instructions, internal remarks
- Document upload references

**Line fields:** Same pattern as quotation (items from master, HSN, qty, rate, disc, tax, charges)

**Initial status:** Created / Saved

**Detail actions:** - Preview / Print / PDF (DocActions)

- **Generate Proforma**
- **Send to Production** (creates work order)
- **Create shipment**
- **Post invoice**
- **Advance stage** (manual step-through)

**Revision workflow:** After send-to-production, critical field changes set `revisionPendingApproval` → **Revision Approval** queue.

**Number prefix:** SO

See Section 6 for the full 22-stage pipeline.

---

## 4.10 Tax Invoices

**Purpose:** GST-compliant billing (domestic and export); links to sales order and receivables.

**UI:** Tax Invoices list, Create/Edit Tax Invoice, invoice detail with compliance actions

**Invoice types:** - Domestic Tax Invoice

- Export Invoice
- SEZ Invoice
- Deemed Export Invoice

**Key fields:** - Invoice type, GST treatment

- Customer, dates, place of supply
- Linked sales order
- Payment & delivery terms, addresses
- Currency, exchange rate, FX totals
- Bank details (proforma/tax invoice policy)
- **Export block:** IEC, LUT number, incoterms, ports, weights, buyer country, export declaration, supply type
- Line items, freight/packing/insurance

**Invoice statuses:** Posted, Partially Paid, Paid, Cancelled

**Compliance display statuses:** E-Invoice Generated, E-way Generated, E-Invoice + E-way (simulated IRN flow in prototype)

**Print copies:** ORIGINAL, DUPLICATE, TRIPLICATE, TRANSPORTER, OFFICE, RECIPIENT (multi-copy print modal)

**Ready-to-invoice banner:** Shows SOs in dispatch-ready stages without invoice

**Number prefix:** INV

Tax Invoices also appear under **Accounts → Receivables** for payment recording.

---

## 4.11 Order Tracking

**Purpose:** Kanban-style visibility of all open sales orders by stage.

**Features:** - One card per pipeline stage (excluding Closed) with order count

- Click stage → list of orders in that stage
  - Drill-down: Order detail (WO, material requirement, dispatch, timeline)
  - Customer snapshot and value breakdown popups
- 

## 4.12 Order History

**Purpose:** Archive of closed/completed orders.

**Fields shown:** SO number, customer, closure date, final status, lifecycle event count

**Action:** View opens printable order timeline

---

## 4.13 Discount Approval

**Purpose:** Manager queue for high-discount quotations.

**Rule:** Quotations with line or overall discount > **10%**

**Actions:** Approve (→ Approved) / Reject (→ Draft)

**Requires:** Approve permission

---

#### 4.14 Revision Approval

**Purpose:** Control changes to sales orders after production has started.

**Rule:** SO with revisionPendingApproval after send-to-production edits

**Actions:** Approve (notifies production, updates linked WO) / Reject

**Requires:** Approve permission

---

#### 4.15 Price List

**Purpose:** Standard and floor rates per item for quotation pricing control.

**Fields:** Item (master), list rate, floor rate, effective date

**Usage:** Quotation lines warn when rate is below floor rate

---

#### 4.16 Currencies

**Purpose:** Multi-currency support for customers and invoices.

**Fields:** Code, name, symbol, rate to INR, base currency flag

---

#### 4.17 PIN Codes

**Purpose:** Auto-fill city, district, state, state code on addresses.

**Fields:** PIN, city, district, state, state code, country

---

### 5. Document conversion pipeline

Standard path shown on quotation detail (**Conversion workflow**):

Enquiry → Quotation → Proforma Invoice → Sales Order → Tax Invoice → Dispatch

#### Conversion matrix

| From    | To          | How                                                |
|---------|-------------|----------------------------------------------------|
| Enquiry | Quotation   | <b>Create Quotation</b> on enquiry detail          |
| Enquiry | Sales Order | <b>Convert to Sales Order</b> (requires quotation) |

| From        | To          | How                                            |
|-------------|-------------|------------------------------------------------|
| Quotation   | Proforma    | Conversion button on quotation view            |
| Quotation   | Sales Order | Conversion button; marks quote <b>Won</b>      |
| Quotation   | Tax Invoice | Ensures SO, opens invoice builder              |
| Quotation   | Dispatch    | Ensures SO, creates shipment                   |
| Sales Order | Proforma    | <b>Generate Proforma</b> on SO detail          |
| Sales Order | Production  | <b>Send to Production</b> → Work Order         |
| Sales Order | Shipment    | <b>Create shipment</b> (dispatch-ready stages) |
| Sales Order | Tax Invoice | <b>Post invoice</b>                            |
| Shipment    | Delivered   | Dispatch module: In-transit → Delivered        |

All conversions use `VG.forwardDocument` with confirmation dialogs (`doc-conversion.jsx`) and audit logging via `store.recordDocumentConversion`.

## 6. Sales order lifecycle

Sales orders progress through **22 stages** (`ORDER_FLOW`):

| #  | Stage                          |
|----|--------------------------------|
| 1  | Created / Saved                |
| 2  | Sent to Production             |
| 3  | Accepted by Production         |
| 4  | BOM Finalized                  |
| 5  | Material Requirement Generated |
| 6  | Material Shortage Pending      |
| 7  | Material Required              |
| 8  | Material Partially Issued      |
| 9  | Material Fully Issued          |
| 10 | Production In Progress         |
| 11 | Production Completed           |
| 12 | Sent to Finished Goods Store   |
| 13 | Sent to Quality                |
| 14 | QC Pending                     |
| 15 | QC Accepted                    |
| 16 | Ready for Dispatch             |
| 17 | Partially Dispatched           |
| 18 | Fully Dispatched               |
| 19 | Closed                         |
| —  | On Hold                        |
| —  | Cancelled                      |

**Automatic updates:** Production, inventory issue, QC, and dispatch modules update SO stages via `store._setSOStage`.

**Manual advance:** SO detail allows stepping through stages (with special handling for production acceptance).

**Invoicing stages:** Ready to Dispatch, Ready for Dispatch, Dispatch Planned, Partially/Fully Dispatched, Dispatched, Invoiced

---

## 7. Master data dependencies

| Master             | Collection        | Used in                                |
|--------------------|-------------------|----------------------------------------|
| Customers          | customers         | All transactions                       |
| Items              | items             | Quote, SO, proforma, invoice lines     |
| Categories         | categories        | Enquiry requirement lines              |
| Taxes              | taxes             | Line tax %                             |
| Price list         | priceList         | List rate + floor rate                 |
| Payment terms      | paymentTerms      | Customer, quote, SO, proforma, invoice |
| Delivery terms     | deliveryTerms     | Same                                   |
| Currencies         | currencies        | Multi-currency transactions            |
| PIN codes          | pincodes          | Address auto-fill                      |
| Bank accounts      | Company profile   | Proforma & tax invoice PDFs            |
| Document templates | documentTemplates | PDF layout per doc type                |
| Company profile    | company           | GSTIN, headers, E-Invoice              |

**Default seeded payment terms:** 100% Advance; 50% Advance / 50% before dispatch; 30/45 Days Credit; Against Delivery

**Default seeded delivery terms:** Ex-Works, FOR Destination, Within 1/2/4 Weeks

Items, categories, taxes, and units are maintained in the **Inventory** module but are required for sales line entry.

---

## 8. Numbering

Document numbers use `store.nextNo()` with Admin-configurable **Number Series** (`VG.numberingEngine`).

| Document    | Default prefix | Admin key           |
|-------------|----------------|---------------------|
| Enquiry     | ENQ            | enquiry             |
| Lead        | LEAD           | lead                |
| Quotation   | QT             | quotation           |
| Sales Order | SO             | salesOrder          |
| Proforma    | PI             | proforma            |
| Tax Invoice | INV            | taxInvoice          |
| Shipment    | SH             | dispatch            |
| Customer    | CUST           | customer            |
| Work Order  | WO             | (Production module) |

| Document | Default prefix | Admin key |
|----------|----------------|-----------|
|----------|----------------|-----------|

Default pattern: **prefix + calendar year + zero-padded sequence** (yearly reset). Legacy slash formats are normalized on migration.

Configure under **Admin → Numbering Settings**.

## 9. Approvals and field permissions

### Built-in approval rules (Sales module)

| Type               | Trigger                            | Queue page         |
|--------------------|------------------------------------|--------------------|
| Quotation discount | Discount > 10%                     | Discount Approval  |
| SO revision        | Edit after send-to-production      | Revision Approval  |
| Customer master    | New customer without approver role | Customers (inline) |

### Admin approval workflows (seeded)

Configurable in Admin → Approvals: - Quotation discount  
 - Sales order  
 - (Plus purchase, leave, vendor payment, etc.)

### Field permissions (Admin → Field Permissions)

Granular control per module: quotation, proforma, salesOrder, customer, etc.

**Default for Sales Executive on quotations:** - rate — visible, not editable  
 - discountPct — editable, approval required when over limit

Enforced via `VG.fieldRule(roleKey, "quotation", field)`.

## 10. PDF, print, and email

| Document      | Preview      | Print            | PDF         | Email                     |
|---------------|--------------|------------------|-------------|---------------------------|
| Quotation     | Yes          | Yes              | Yes         | Yes (mailto + marks Sent) |
| Sales Order   | Yes          | Yes              | Yes         | —                         |
| Proforma      | Yes          | Yes              | Yes         | —                         |
| Tax Invoice   | Yes          | Yes (multi-copy) | Yes         | —                         |
| Order History | Yes timeline | Yes              | via print   | —                         |
| Customer 360° | Yes          | Yes statement    | Yes         | Yes statement             |
| Reports       | Yes          | Yes              | Save as PDF | —                         |

**Engine:** `printDocument` → `VG.printStyledDocument` with document templates from `doc-designer.jsx`.

**Quotation PDF:** Industrial international layout (VG.buildIndustrialDocument / premium commercial offer template).

**Invoice copies:** User selects copy types; each prints on a separate page.

**Email:** Quotation email opens the system mail client with subject/body; PDF is not auto-attached.

---

## 11. Reports

### Sales → Reports (12 reports)

| #  | Report name                  |
|----|------------------------------|
| 1  | Quotation Register           |
| 2  | Sales Order Register         |
| 3  | Tax Invoice Register         |
| 4  | Export Invoice Register      |
| 5  | Currency-wise Sales Report   |
| 6  | Exchange Rate Report         |
| 7  | LUT-wise Export Report       |
| 8  | Country-wise Export Sales    |
| 9  | Customer-wise Export Sales   |
| 10 | Foreign Currency Receivables |
| 11 | Won / Lost Analysis          |
| 12 | Customer Master              |

All reports include company header/footer. Requires **Print** permission.

### Enquiry reports (9 reports)

Available under Enquiries page and embedded in Sales → Reports:

| # | Report name                     |
|---|---------------------------------|
| 1 | Enquiry status report           |
| 2 | Offer sent report               |
| 3 | Pending quotation report        |
| 4 | Follow-up due report            |
| 5 | Lost enquiry report             |
| 6 | Won enquiry report              |
| 7 | Salesperson-wise enquiry report |
| 8 | Customer-wise enquiry report    |
| 9 | Product-wise enquiry report     |

### List-level exports

- Most lists support **Print** via RecordTable
  - Customer 360° supports **Export Excel** (CSV), transaction summary PDF, statement PDF
-

## 12. Cross-module integrations

### Production

- **Send to Production** creates a **Work Order** (`store.sendSalesOrderToProduction`)
- SO stages sync with BOM, material issue, production progress, FG transfer
- Revision approval updates linked work order

### Inventory

- Items, HSN, units from Item Master
- Price list floor rates on quotations
- Material requirements and issues visible in Order Tracking drill-down

### Quality

- SO stages: Sent to Quality → QC Pending → QC Accepted
- QC acceptance can push dispatch queue → Ready for Dispatch

### Dispatch

- **Shipments** module manages Pending → In-transit → Delivered
- Sales creates shipment from SO; dispatch team completes delivery
- Delivery updates SO to Partially/Fully Dispatched; full delivery writes **orderHistory**
- Shipment prefix: **SH**; Dispatch Note / Gate Pass PDF

### Accounts

- **Receivables** mirrors invoices + payment recording
  - `store.recordPayment` updates invoice Paid / Partially Paid
  - Customer 360° finance tiles require accounts permission
  - Receivables ageing report in Accounts module
- 

## 13. Roles and permissions

### Built-in sales roles

| Role                   | Module access                      | Notable actions                              |
|------------------------|------------------------------------|----------------------------------------------|
| <b>Sales Manager</b>   | sales, enquiry, reports, documents | approve, delete, export, print               |
| <b>Sales Executive</b> | sales, enquiry, documents          | add, edit, export, print (no approve/delete) |
| <b>Viewer</b>          | sales (read)                       | view, print only                             |

## Permission actions

View, Add, Edit, Delete, Approve, Reject, Print, Export/Download, Import, Email, Settings

Configured per role in **Admin → Permissions**.

## 14. Technical notes

- **Architecture:** Zero-build React + Tailwind (CDN/Babel); data in `VG.store` (PostgreSQL JSONB or `localStorage` fallback).
- **UI pattern:** Full-page `InternalScreen` for forms; list pages use integrated `ListPage` + `RecordTable`.
- **Customer scoping:** `VG.useFilteredCustomerRows` / `CustomerFilterBanner` on transactional lists.
- **State linking:** Pending navigation flags (e.g. `VG._pendingQuotationFromEnquiry`, `VG._pendingSalesOrderCreation`) seed cross-section workflows.
- **Quotation math:** `computeQuote()` handles line tax, charges, and round-off (auto/manual).
- **Export invoices:** `VG.isExportInvoiceType`, LUT/Bond, incoterms, multi-currency FX totals in `invoice-export.jsx`.

## Appendix A — Quotation lifecycle statuses (derived)

| Display status        | Meaning                              |
|-----------------------|--------------------------------------|
| Draft                 | Not yet submitted                    |
| Pending Approval      | Awaiting discount approval           |
| Approved              | Ready to send/convert                |
| Quote Sent            | Marked sent / emailed                |
| Proforma Issued       | Linked proforma exists               |
| Sales Order Generated | Linked SO exists                     |
| Tax Invoice Generated | Linked invoice exists                |
| Dispatched            | Linked shipment delivered/in transit |
| Won / Lost            | Commercial outcome                   |

## Appendix B — Files changed most often for Sales features

|                        |                                                             |
|------------------------|-------------------------------------------------------------|
| src/sales.jsx          | - Main module (quotations, SO, invoices, tracking, reports) |
| src/enquiry.jsx        | - Enquiry CRM                                               |
| src/customer.jsx       | - Customer master & 360°                                    |
| src/doc-conversion.jsx | - Conversion confirmation UX                                |
| src/doc-designer.jsx   | - PDF templates & print engine                              |
| src/invoice-export.jsx | - Export invoice types & GST treatment                      |
| src/dispatch.jsx       | - Shipments (downstream of SO)                              |
| src/accounts.jsx       | - Receivables & payments                                    |
| src/store.jsx          | - Data APIs, numbering, SO stage sync, conversions          |
